

## ROTARY TYPE NUMERATOR

# INDUSTRIAL MARKING SOLUTIONS

### Rotary Type Numerator

- Perfect time-saver for repeat number by hand stamping
- Serial numbers, part numbers or code numbers can be marked on steel, aluminium, brass etc.
- Compact design, so it can be carried to mark components
- Ideal for steel producers
- 'Marking wheels' can be rotated to any desired positions, then locked positively by a locking pin
- Individual release: which means one wheel can be released at a time, without disturbing set-up of other wheels (The locking pin can be pulled to release just that one wheel)
- No loose parts. The unit is complete, compact and sturdy tool-always ready to use
- Wheels made from special tool Steel, heat-treated for high wear resistance
- All parts treated to remove scale and plated to resist rust
- Each 'marking wheel' has 11 faces with 0 to 9 figures on 10 faces and one face blank. Stamping is done by a hammer and resulting impression is uniform in depth, spacing and alignment for any figure set up

### The standard Size Range Rotary Type Numerators is as follows:

Rotary Type Numerator Code Number	Character Size mm	Character Spacing mm	Number of Wheels	Actual Size
6 RTN 2	2	2	6	234 ABC
6 RTN 3	3	3	6	234 ABC
6 RTN 4	4	4	6	234 ABC
5 RTN 5	5	5	5	234 ABC

This unit is complete tool - ready to use
